## **Defense The Farm Features Key:**

**Simple yet complex.** The gameplay and interface requires few actions and keystrokes. Yet the story, while simple in many ways, is complex and integrated into the game. The entire experience is like coming to understand the extraordinary depth of what you are playing.

**Challenging yet rewarding.** Players face challenges they cannot solve quickly using the keys in the usual fashion. Work smarter, not harder. Careful planning usually leads to faster, more rewarding solutions.

**Realistic.** Visual elements are accurate. Some puzzles use a token, and feature actual doors.

**Embellished with screenshots.** Enjoy retro screenshots of the game as you are learning it.

## **Key Features:**

- **Interactive Story (required)** Have you ever played a game where you are challenged to solve a labyrinth? Where you can tell a story about the events occurring as you solve the puzzle?
- **User-controlled Minotaur (required)** The game offers a complete 'Story Mode' and 'Hidden Story Mode' (see Gameplay section for more info on this).

- 
- **Experimental Super-Mode (*optional*)** Does the Minotaur's labyrinth have features you cannot access from the start? Have some fun and reach some goals that would be impossible with the regular setting!

## **Screen Shots:**

**All screenshots include and/or were made in Xonotic**

The Big FixFox (computer game)Developed by:Labooyan Production (Jean-Marc Collard)Year of release: 2010Platforms: PC, XBLA, PS3, PS Vita, Xbox 360, Nintendo 3DS, Wii U, iOSPrice: 10.99 EUR (via Steam)Language: English / FrenchPublisher: Electronic ArtsDescription: "The Big Fix" is a simple physics-based puzzle game in which the player gets various cubes on the screen in order to form a chain of moving blocks. As the chain gets longer and longer the size of the blocks decreases to an extreme, which requires the player to manage each of the blocks individually. Your goal is to collect all of the blocks within a limited amount of time.In game you have four options: Select a box, rotate a box or select boxes, or attach a box to another box. Each action can be done with a specified amount of energy and use.Time, energy, and the surrounding boxes determine the movement. The further a box is from the player, the more energy will be required to perform a certain action.

The 21st century has created a world, where humans survive in bunkers, in cities. Many people live alone and are not close to others, sometimes just knowing the habits of their parents, relatives and the people in charge. In a world full of machines, where feelings do not exist, the memory of Katarina, an anthropologist from the museum "Ayyad" was created by the doctors. It is the first creation of "Ayyad" that has seen the light of day. The game of memory creates the chance to discover the world, its secret and show the human soul. ## **What's new in Defense The Farm:**

**, the table-top RPG from Vortex Games, has surpassed 1,200 pre-orders from events like King of CaliCon and Eureka Massachusetts, which was attended by over 1,200 gamers. The game was successfully Kickstarted in May 2016 and is now without question one of, if not the top tabletop RPG in the world. “The game is an incredible achievement, particularly for a unique game in a competitive gaming space,” said Richard Mackenzie, founder and CEO at Vortex Games. “We are a small company, but we have a large community of passionate fans who we’ve interacted with throughout the development of the game, as it’s grown I’ve been able to attend a number of huge events where we’ve had a presence—shows like E3 / X-CON, PAX Unplugged, CaliCon, and Essen. We’re absolutely ecstatic that over 1,200 people have pre-ordered and have been so enthusiastic about it. We are now fully funded and working hard to bring out the full game in the third quarter of 2017.”**

**Interstellar Invaders will be a double-sided board game in which you and your friends will begin a campaign as one faction or the opposing faction with each one being given an auto-schematic unit that they can upgrade as they progress. In essence, you’ll have to scout out your “civilization” to acquire the best upgrades for the first phase and fend off against the opposing faction the same way. “The game is an interstellar conquest game,” said Mackenzie. “It’s a game where you and your friends are all represented and each one begins with a base that they must research their automated fleet, but you’ll have to be careful of missing scouts as they can trick you into thinking you’re closed down. The default is that both factions start with the same tech tree; you only begin to diverge as you improve the fleet with supply drops, more powerful upgrades and that sort of thing. “When the game starts players will be able to send out space-cased units to discover what’s going on around them, but they can be tricked by enemy units which can lead to capture events and then the assassination of leaders that they might get surrounded by. You’ll find that each unit has a set of stats that they hold, be they strength**
