

# Download

if you have multiple local torrent downloads open within vuze (or another application) you can label each file to distinguish between them (for example, to make it clear that the ones from a given site you'd like to keep for future use are safe). the label field is not editable. vuze needs to be configured before the welcome screen becomes available. configuration of vuze may be done either by selecting "startup" from the vuze menu or pressing the ".." button in the right lower corner of vuze for selecting a startup profile. current vuze

---

versions of a profile already exist, which are called standard, normal, or internet. i2p is a software router, that doesn't just use the traditional tcp/ip network, but adds a layer on top. vuze doesn't use any of the settings of the i2p interface, therefore not all is possible and there are limitations on how you can configure the vuze i2p router. the settings of the vuze router can be changed in the "vuze settings" tab. just select the item "vuze settings" (as marked by a green arrow). you can then select the settings of the vuze i2p interface and then choose an option, which directly affects the vuze i2p interface. the available settings are: click on the green "start download" button to open the torrent download dialog. selecting a torrent using the green "start" button immediately starts the torrent download. if you're using the manual download feature, a "resume" button can be used to continue with a previous

---

incomplete download. if you drag a torrent on top of the vuze window a "start" button appears in the corner. this will start the torrent.

---

## How To Search For Torrents Using Vuze
