What's New In All Recorder?

Use this easy-to-use sound recorder to record everything you see, hear or do. Use its simple intuitive

interface and audio editor to record audio files and save them as MP3, WAV or WMA. For example, you can record audio from video clips, your favorite online radio stations, games, DVDs or VODs, then edit your audio files to add fade in and fade out effects, normalize the sound levels, scale, squeeze, silence, invert volume or reverse the song. Further customization of the tracks is possible by defining the sample rate, bit rate and channel mode of the input and output files. Recordings can also be scheduled at various time frequencies, such as once every few minutes, hours or days, every day or at login. The software enables you to program when to stop the process. The app can also auto-split your track into smaller pieces, depending on the chosen settings. The fact of the matter is that All Recorder is an advanced tool, with an intuitive interface. However, inexperienced users could find this app difficult to work with this at first. Features:

- Record everything: video, music, sound, photos
